ECO606 (Mega File)

Mid Term (Live Quiz)

1. **In the equation; Y = C + 10 + GO, consumption is shown by:**
    - A) C ✓
    - B) 10
    - C) GO
    - D) Y
2. **Market equilibrium condition: Qd = Qs depicts the:**
    - A) Inequality
    - B) Identity ✓
    - C) Equation
    - D) Matrix
3. **Matrices do not allow which operation?**
    - A) Addition
    - B) Subtraction
    - C) Multiplication
    - D) Division ✓
4. **For three matrices A, B and C, A + (B + C) = (A + B) + C describes:**
    - A) Distributive law
    - B) Associative law ✓
    - C) Substitution law
    - D) Commutative law

5. **For mxn order matrix, if m > 1 and n = 1 then it is called as:**
    - A) Unity matrix
    - B) Column vector ✓
    - C) Zero matrix
6. **Null vector is a vector in which all elements are:**
    - A) Zero ✓
    - B) One
    - C) Less than zero
7. **Given the above set of equations, $11P_1 — P_2 — P_3 = 31 — P_4 + 6P_5 — 2P_6 = 26 — P_7 — 2P_8 + 7P_9 = 24$, P_1, P_2, P_3 is called:**
    - A) Parameter matrix
    - B) Variable matrix
    - C) Identity matrix
    - D) Coefficient matrix ✓
8. **In the equation; Qd = a — bP, slope is shown by:**
    - A) P
    - B) —b ✓
    - C) a
    - D) Qd
9. **For mxn order matrix, if m = 1 and n > 1 then it is called as:**
    - A) Zero matrix
    - B) Row vector ✓
    - C) Column vector
    - D) Unity matrix
10. **For matrix determinant of A can be calculated as:**
    - A) (-3*1) - (0) ✓
    - B) (-3*1) - (2)
    - C) (-3*0) - (2)

- D) (-3*2) - (ba)

1. For mxn order matrix, if m>1 and n=1 then it is called as:

- Unity matrix
- Zero matrix
- O
- Row vector
- **Column vector ✓**

---

2. For matrix, determinant of A can be calculated as:

- O
- (-3%2) - (1x1)
- (-3x0) - (1x2)
- (-3»1) - (x0)
- **(-3x1) - (1x2) ✓**

---

3. Which factor may shift the supply curve in partial linear market equilibrium?

- Improved technology ✓
- Quantity supplied
- Price
- Quantity demanded

---

4. For three matrices A, B and C, Ax(BxC) = (AxB)xC describes:

- Substitution law
- **Associative law ✓**
- Commutative law
- Distributive law

---

5. Given the above set of equations, 11P, — Py — Py =31 —P, + 6P, — 2P, = 26 —P, — 2P, +7P, =24, 31 26 24 is called:

- Variable matrix
- **Coefficient matrix ✓**
- Parameter matrix
- Identity matrix

---

6. a rows and b columns in a matrix makes the order of:

- a/b
- **axb ✓**

---

7. Qat+bP=a Q,—dP=-—ec, Given the above set of equations, Qa Qs P is called:

- Variable matrix ✓
- Coefficient matrix
- Identity matrix
- Parameter matrix

---

8. Given the above set of equations, 1-1 0 1 0 6b 0 1 -d is called:

- **Coefficient matrix ✓**
- Variable matrix
- Identity matrix
- Parameter matrix

---

9. Market equilibrium condition: Qd = Qs depicts the:

- Matrix
- Identity
- Inequality
- **Equation ✓**

10. In the equation; Qd = a - bP, slope is shown by:

- **-b ✓**

. Average total cost curve when plotted on a graph gives:

- Horizontal line
- Straight line
- Vertical line
- **Quadratic parabolic curve ✓**

---

2. Dependence of one variable on another variable is known as:

- Domain
- Range
- Set
- **Function ✓**

---

3. Which of the following problems are included in mathematical economics?

- Microeconomics problems
- All of the given options ✓
- Macroeconomics problems
- International economics problems

---

4. Power of an independent variable is zero in:

- **Constant functions ✓**
- Quadratic functions
- Cubic functions
- Linear functions

---

5. Finding uncommon elements of the universal set in comparison to set A is called:

- Intersection of set A and U
- Distribution of set A and U
- **Complement of set A ✓**
- Union of set A and U

---

6. Which of the following shows negative values of both x and y coordinates in a four quadrant diagram?

- Quadrant IV
- Quadrant I
- **Quadrant III ✓**
- Quadrant II

---

7. Which of the following shows positive values of both x and y coordinates in a four quadrant diagram?

- Quadrant IV
- Quadrant III
- Quadrant II
- **Quadrant I ✓**

---

8. Functions when plotted on a graph gives horizontal line are called:

- **Constant functions ✓**
- Quadratic functions
- Cubic functions
- Linear functions

---

9. Cobb Douglas production function:

Q=β1Lβ2Kβ3Q = \beta_1 L^{\beta_2} K^{\beta_3}Q=β1Lβ2Kβ3 exhibits decreasing returns to scale if:

- $(\beta2+\beta3)=1$(\beta_2 + \beta_3) = 1$(\beta2+\beta3)=1$
- $(\beta2+\beta3)<1$(\beta_2 + \beta_3) < 1$(\beta2+\beta3)<1$ ✓
- $(\beta2+\beta3)>1$(\beta_2 + \beta_3) > 1$(\beta2+\beta3)>1$
- $(\beta2+\beta3)=0$(\beta_2 + \beta_3) = 0$(\beta2+\beta3)=0$

---

10. Law of demand is depicted by:

- Cost = f (Output)
- **Qs = f (Price) ✓**
- Revenue = f (Tax rate)

1. **y = 5^x is an example of:**
   - Quadratic function
   - Exponential function ✓
   - Linear function
   - Cubic function

---

2. **Cobb Douglas production function exhibits increasing returns to scale if:**
   - $(\beta_2 + \beta_3) = 0$
   - $(\beta_2 + \beta_3) > 1$ ✓
   - $(\beta_2 + \beta_3) = 1$
   - $(\beta_2 + \beta_3) < 1$

---

3. **-1, -2, -3, -4, -5, ... are examples of:**
   - Fractions
   - Parameters ✓
   - Irrational numbers

---

4. **Functions when plotted on a graph give horizontal line are called:**
   - Linear functions
   - Cubic functions
   - Quadratic functions
   - Constant functions ✓

---

5. **Equation of hyperbola can be written as:**
   - x * y = k ✓
   - x / y = k
   - x + y = k

---

6. **Finding common elements in sets is known as:**
   - Union
   - Intersection ✓
   - Complement
   - Distribution

---

7. **Cobb Douglas production function exhibits decreasing returns to scale if:**
   - $(\beta_2 + \beta_3) = 1$
   - $(\beta_2 + \beta_3) > 1$
   - $(\beta_2 + \beta_3) = 0$
   - $(\beta_2 + \beta_3) < 1$ ✓

---

8. **Functions when plotted on a graph gives a two bumps curve are called:**
   - Quadratic functions
   - Cubic functions ✓
   - Constant functions
   - Linear functions

9. **Which of the following shows the reciprocal of a function?**
   - Linear function
   - Exponential function
   - Logarithmic function
   - Inverse function ✓

10. **Marginal cost curve when plotted on a graph gives:**

- Straight line ✓
- Horizontal line
- Vertical line
- Quadratic parabolic curve

 Finding uncommon elements of the universal set in comparison to set A is called:

- Intersection of set A and U
- Union of set A and U
- Distribution of set A and U
- ☑ Complement of set A

 Which of the following shows positive values of both x and y coordinates in a four quadrant diagram?

- ☑ Quadrant I
- Quadrant III
- Quadrant IV
- Quadrant II

 Which of the following problems are included in mathematical economics?

- International economics problems
- ☑ All of the given options
- Macroeconomics problems

- Microeconomics problems

 Autonomous investment is an example of:

- Constant functions
- Quadratic functions
- Cubic functions
- ☑ Linear functions

 Autonomous investment is an example of:

- Quadratic functions
- Cubic functions
- ☑ Constant functions
- Linear functions

 Finding common elements in sets is known as:

- ☑ Intersection
- Distribution
- Union
- Complement

 Functions when plotted on a graph give a straight line are called:

- ☑ Linear functions
- Constant functions
- Cubic functions
- Quadratic functions

 Dependence of one variable on another variable is known as:

- Range
- Set
- ☑ Function

 Power of an independent variable is zero in:

- Cubic functions
- Constant functions

- Linear functions
- ☑ Quadratic functions

? **Functions when plotted on a graph gives a horizontal line are called:**

- Cubic functions
- Linear functions
- ☑ Constant functions
- Quadratic functions

? **Marginal cost curve when plotted on a graph gives:**

- Quadratic parabolic curve
- Horizontal line
- Vertical line
- ☑ Straight line

Join Group👇 *WhatsApp channel For Updates*

https://whatsapp.com/channel/0029VaWxVF55kg6xRdCdec1D

🔥🔥 Paid Vu Lms Handling 🔥🔥

♦ 1 GDB= Rs 100

♦ 1 Quiz= Rs 200

♦ 1 Assignment=Rs 250

💎 Rs 500 per subject half semester . It will include all assignment quiz and gdbs

200 per subject half semester for lecture play

👑🎉80-100% Marks Guaranteed 🎉👑

🔥 Miss Mehwish: 03184148783 03171491481 0306 9080308 🔥
